BRASS PLUG EXTENSIONS

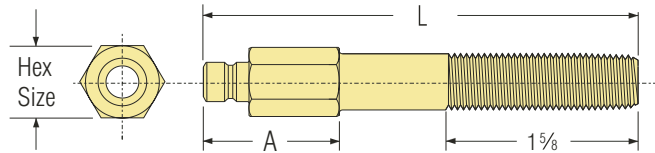

Extension Plugs are compatible with all major competing mold connection systems.

In stock sizes from 1/16" thru 1/2" pipe,

- In addition to standard lengths, Extension Plugs may be ordered in any exact length required.
- Stocked in Brass
- Available to order in stainless, or plated steel.
- Special Extension Plugs to interchange with industrial connection systems are available to special order for air, hydraulic, JIC, SAE, etc.

NOTE: **BSPT**
(British Standard Pipe Tapered) threads are also available. Please specify.

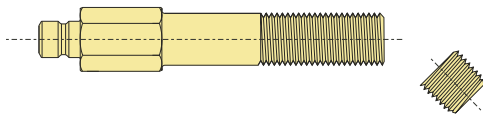

SEE PRICE TABLE

- CAUTION -

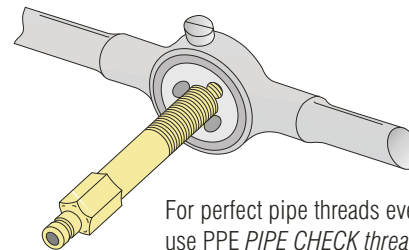

We checked competing extension plugs and found they have a straight undersized thread not a standard pipe thread which is a must for a positive seal. That's why ours are **PATENTED**.

Length Adjustments & Installation

1. When special length adjustments are required, simply cut piece to length and chamfer end.

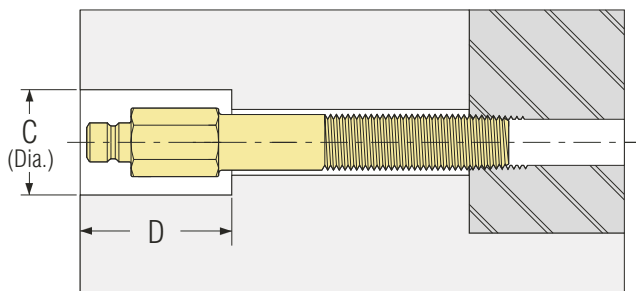

2. Turn into standard pipe threading die to re-taper threads.

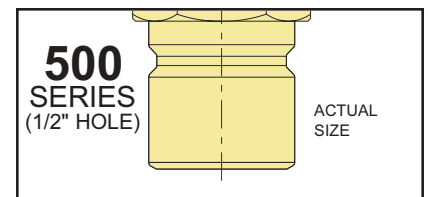

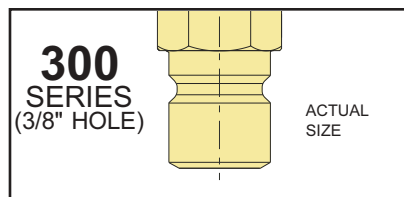

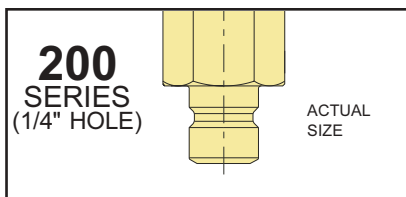

For perfect pipe threads every time, use PPE PIPE CHECK thread gauge.

3. At assembly, the tapered brass threads provide a dependable, leak proof seal. With one-piece construction, removability is always guaranteed.
