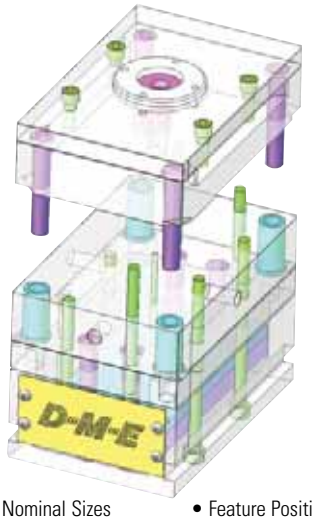
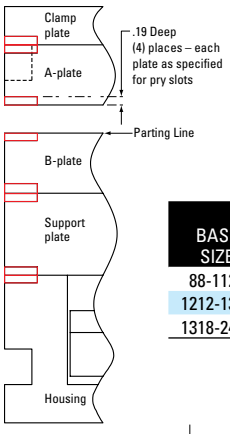
American Standard Mold Base Features



- 43 Nominal Sizes
- 9 Plate Thicknesses
- 4 Steel Types
- Guided Ejection
- Pry Slots
- Lifting Holes
- Leader Pin Vents
- Ejector Housing Cover
- Feature Positions
- Feature Omissions
- Three-Piece or Welded Housing Type
- Clamp Slot Type
- Mixed Steel
- Sprue Puller Pin Diameter
- Stop Pin Location

Pry Slots

Mold base features Pry Slots, installed in any plate specified, on the parting and/or non-parting line side. This provides handling ease when opening and/or disassembling a mold.



BASE SIZE	SLOT LENGTH Z
88-1123	.56 X 45°
1212-1315	.88 X 45°
1318-2435	1.00 X 45°

American Standard Mold Base Features

Leader Pins, Vents & Bushings

Leader Pins and Bushings align both halves of the mold at the parting line. Leader Pin Vents, which allow trapped air to escape from the mold, are designed into all 15-inch-and-wider series molds. When desired, they can be specified on smaller molds.

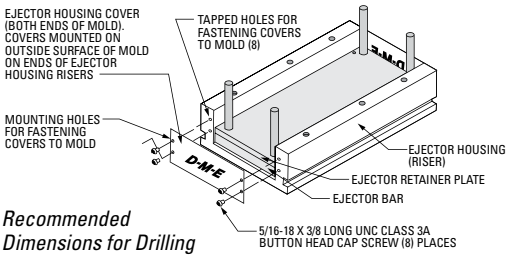
Ejector Housing & Cover

Ejector Housing Cover

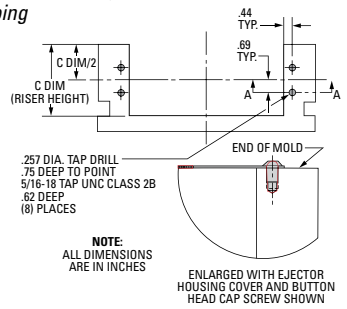
For additional operator safety, SelectBase molds include an ejector housing cover, except when a longer length ejector bar is selected. The perforated D-M-E logo helps the operator to visually determine if the ejector plate and ejector retainer plate are in the returned position. The cover is fastened on both sides with 5/16-18 button-head cap screws. Once again, D-M-E is leading the industry into a safer work environment.

Ejector Housing

D-M-E offers a selection of housing types to fit application demands. A one-piece welded housing is available for customers requiring maximum rigidity and robust durability. For maximum flexibility of configuration options, a three-piece housing is also available.

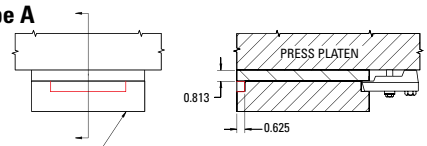


Recommended Dimensions for Drilling and Tapping



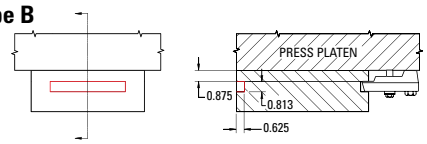
Clamp Slots

Type A

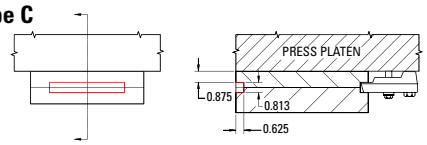


NOTE:
When this plate is 0.875 thick, the slots will be machined through the thickness.

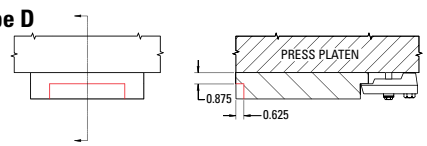
Type B



Type C



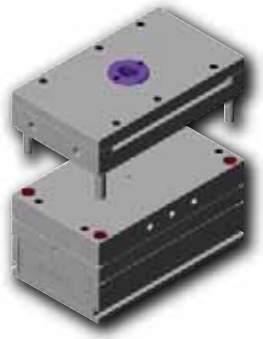
Type D



Lifting Holes

Lifting Hole Diameters

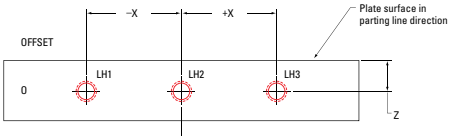
BASE SIZE	PLATE THICKNESS	
	0.875	1.375
88-1118	1/2-13 UNC	1/2-13 UNC
1123-1524	5/8-11 UNC	5/8-11 UNC
1529-1829	5/8-11 UNC	3/4-10 UNC
1835-2429	5/8-11 UNC	1"-8 UNC
2435	N/A	1"-8 UNC

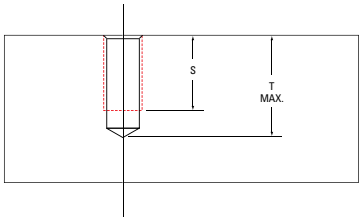


Lifting Holes

THREAD SIZE	S	T MAX.
1/2-13	1.00	1.38
5/8-11	1.25	1.75
3/4-10	1.50	2.00
1"-8	2.00	2.62

Lifting Holes can be used to install hoist rings for ease of handling. Mold base can be configured only with Lifting Holes which are appropriate for the specific mold base size. Refer to the D-M-E catalog for a comprehensive selection of Hoist Rings.

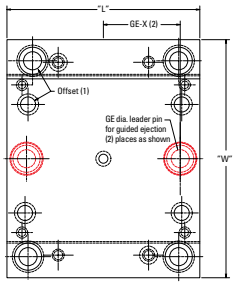




American Standard Mold Base Features

Guided Ejection Systems

Guided Ejection Systems hold the ejector assembly in alignment and support the weight of the ejector assembly throughout the molding cycle – greatly reducing wear on ejection components and preventing cocking of the ejector assembly.



"B" HALF OF MOLD FOR 88, 812 & 108 MOLD BASE SIZE ONLY

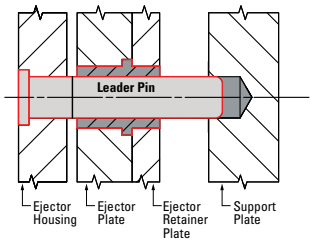
System 1

When pins are installed in the support plate, the ejector housing can be removed from the mold without removing ejector plates. This permits easy access to service the ejector system.



System 2

Pins installed in the ejector housing permit fast installation. When the ejector housing is removed from the mold base, the complete ejector assembly is removed.

Sizes & Thicknesses

43 Nominal Sizes

- The American Standard Mold Base is available in 43 nominal sizes to match the mold space requirements for your application.
- As the creator of the American mold base standard, D-M-E has the largest selection of mold base sizes and most are available in less than five business days.

9 Plate Thicknesses

- D-M-E offers mold plates for all nominal sizes up to 5-7/8".
- Our own steel processing facility manufactures our mold plate directly from raw steel slabs.

Steels for Structural and Holder Block Applications

D-M-E #1 Steel is a medium carbon quality steel with greater tensile strength than typical plain carbon warehouse steels. It machines easily, but is not "sticky", permitting a faster and smoother cut. International comparisons: DIN 1.1178 (CK 30) and 1.1730 (C 45 W); JIS S 30 CM, S50C, S55C; ISO 683-1 C30E4.

D-M-E #2 Steel is a medium alloy steel specified for durability in structural applications. It is supplied pre-heat treated to 28-34 HRC (271-321 Bhn). A high strength steel, it is ideal for cavity and core retainer plates, clamping plates and support plates in molds. International comparisons: DIN 1.2312 (40CrMnMoS 8 6), 1.7218 (25CrMo4) and 1.2331 (41CrMoS4); JIS SCM 430; ISO 683-2 Type 1.

D-M-E #7 Steel is a modified AISI 400 series stainless steel for holder block applications. It is supplied pre-heat treated to 32-36 HRC (302-340 Bhn). This stainless steel offers corrosion-resistance and exceptional machinability but cannot be further hardened (see D-M-E #6). For humid environments, corrosive plastics, "clean room" or "100% stainless" applications, it is an ideal choice for all structural mold plates. International comparisons: none.

Steels for Cavity & Core Applications

D-M-E #3 Steel is a P-20 AISI 4130 type cavity steel. Exceptionally clean, it is pre-heat treated to 28-34 HRC (271-321 Bhn). It provides good machinability, the ability to heat treat to higher hardness, and exceptional polishability. International comparisons: DIN 1.2311 G40CrMnMo7; JIS none; ISO none.

D-M-E #5 Steel is an AISI/SAE H-13 type thermal shock resistant, hotwork die steel. Supplied fully annealed (approximately 200 Bhn; 13-20 HRC) for easy machinability, it can be subsequently heat treated to the desired hardness with a minimum of deformation. Mainly used for die cast dies, it is also suitable for plastic molds with exceptional hardness or polishability requirements. D-M-E #5 Steel meets or exceeds the acceptance criteria established by the NADCA as detailed in Technical Digest Number 01-80-01D. International comparisons: DIN 1.2344 (X40CrMoV5-1); JIS SKD 61; ISO 4955 H13.

D-M-E #6 Steel is a modified AISI 420 type stainless steel. It is supplied fully annealed to 179-241 Bhn (8-23 HRC), making it readily machinable. Unlike D-M-E #7 steel, D-M-E #6 steel is a cavity-grade material that can be subsequently heat treated to the desired hardness and has excellent polishability. International comparisons: DIN 1.4028 (X30Cr13); JIS SUS 420 J 2; ISO none.

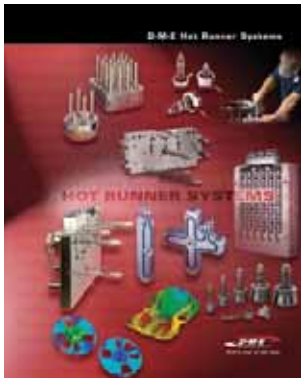
D-M-E: Your Complete Mold Technologies Provider

Every step of the way

Check Out All of the D-M-E Mold Technology Catalogs And You'll See Why We're an Essential Resource to Thousands of Customers Worldwide!



CATALOG: 174 PAGES

D-M-E Hot Runner Systems

Moldmakers, molders and mold designers worldwide look to the D-M-E Hot Runner Systems Catalog for essential hot runner solutions. From best-in-class components to complete, fully-functioning hot half systems, D-M-E has the broadest range of hot runner products and services.

CATALOG: 156 PAGES

MUD Quick-Change Systems From D-M-E

Reduce downtime by as much as 75 percent with an innovative approach to fast production changeovers. Master Unit Die is the leader in quick-change systems and the MUD Catalog offers many systems that will maximize your production volume.

CATALOG: 316 PAGES

D-M-E Mold Components

With the largest selection of mold components available around the globe, the D-M-E Mold Components Catalog has the products that will help you meet the unprecedented demands you face for speed, cost reduction and performance.

CATALOG: 76 PAGES

D-M-E Control Systems

Powerful. Flexible. Affordable. That's what molders want from today's generation of hot runner, valve gate, and process controls, and D-M-E delivers with a broad line of controllers sure to fit the most demanding application.

CATALOG: 76 PAGES

D-M-E Equipment and Supplies

From high-speed cutting tools and finishing and polishing systems to a vast array of maintenance, repair and operation-related products, the D-M-E Equipment and Supplies Catalog is an invaluable resource for mold technology professionals.

CATALOG: 68 PAGES

D-M-E Technical Services

From powerful, online resources available 24/7, to our team of trained, experienced experts committed to helping customers achieve maximum productivity, reliable operation, and better performance, D-M-E's goal is simple: to be an essential resource for your molding challenges every step of the way.

D-M-E, an essential resource to the customers it serves worldwide, offers the industry's broadest range of market-leading products, unsurpassed knowledge and expertise, a global logistics infrastructure that ensures speed and accuracy, and a support organization unrivaled for its ability to assist customers when and where they need it. A complete line of hot runner systems, control systems, mold bases, MUD quick-change mold systems, mold components, moldmaking and molding equipment supplies, and technical services helps customers compete every step of the way.
